Bed wars server minecraft java

Last change on November 9, 2020 in game types By ApexHosting Bedwars1.12Checkout How it works Permissions are configured as such: Member, ranks 1 to 5 and your core staff ranks so mod, admin and owner. All permissions are set up, you'll just need to adjust them based on the rank names as explained below. Everything is protected with worldguard, so you don't have to worry about preventing grief or setting it up yourself, only worrying about it for new things that you add to your server. Deluxetags is a cool feature. You can run the command/tags and all the tags you have access to will show up. Bedwars is a very large plugin and contains a lot of features. 3 cards are already configured, 1 with 4 teams with 1 player in each team and 2 with 4 teams with 2 players in each team. To get into the game, walk forward and there are signs that can be clicked in order to join the game. You will then be sent to a hall when you can choose your team, etc. NAMETAGEDIT GROUP CONFIGURATIONS All NTE groups are placeholder names (rank1 etc), so the customer will have to update them to their rank names, then go ahead and change the permissions to these too. Essentials CHAT FORMAT Chat format are again placeholder names with rank1 to 5. The customer will have to change them AND the name of the PermissionsEX group names to match them for the chat format to work. PermissionsEX As mentioned above, I have configured staff groups and 5 donor groups all with the correct permissions. You will need to change group names to donor groups. GAListener Ports Not sure what ports you allow, but may not link the port if everyone tries to use the port I used to recommend changing. TITLEMANAGER Feel free to set up anything in titlemanager that is the titles on your screen when you join and the lines in the tab. DELUXETAGS These are configurations, however are #TAG1 up to 6. You can change them to anything you want and give permission above and these will appear after the names of the peoples in the chat once they select one. Bedwars Theres so much in bed dwarfs, everything can be configured. I linked the plugin above so they could look at how to set things up, etc. HolographicDisplays/data holograms is where the holograms are located. Feel free to say them to your liking.bAnnouncer Automatic ads in chat, they can be edited too. Plugin Resources link: Wiki Page which is strongly suggested to check because Tells you exactly what you need to do to set up a map: Find commands here: NametagEdit Mineland Network is the best Minecraft servers with high quality game modes, monthly tops, interesting quests for players who like to compete, create and have fun with friends. - Skin works for everyone! - Versions 1.8-1.9-1.10-1.11-1.12-1.13-1.14-1.15-1.16 - All plugins and modes have been coded by ^_^ - Focus on quality - Unique ranks, suffixes and collections - Everyone will find a fashion to their liking - Monthly tops and daily tasks - Good anticheat - Reactive mode mode - No delay, frieses!
